PROFESSIONAL SUMMARY

B.Tech Computer Science student and Full Stack Developer with hands-on experience in React.js, Node.js, Python, SQL, MongoDB, Machine Learning, NLP, and AI-powered applications. Completed a 3-month React.js Developer internship at DZinfotech, with experience building reusable UI components, integrating REST APIs, and developing responsive web applications. Strong foundation in Data Structures & Algorithms, OOP, DBMS, problem solving, and end-to-end software development.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript

Frontend: React.js, Redux, Tailwind CSS

Backend: Node.js, Express.js, Socket.IO

Databases: SQL, MySQL, MongoDB, DBMS

AI / ML: Machine Learning, NLP, Deep Learning, Data Science, OpenCV, Data Visualization

Tools: Git, GitHub, n8n

Core CS: DSA, OOP, DBMS

EXPERIENCE

React.js Developer Intern — 3 Months

DZinfotech

- Developed and maintained React.js-based web applications using reusable and modular UI components.
- Integrated REST APIs with frontend interfaces and handled application data flow for responsive user experiences.
- Worked with responsive UI development and modern frontend practices while collaborating with the development team.
- Used Git/GitHub-based development workflows and contributed to scalable, maintainable web application solutions.

PROJECTS

QueryMind AI (SQLBOT) – AI-Powered SQL Assistant

- Built an AI-powered SQL assistant that converts natural-language requests into SQL queries and assists users with database interaction.
- Developed the application using React.js, Redux, Tailwind CSS, Node.js, Express.js, and MySQL with an AI/LLM-based workflow.
- Implemented database-aware SQL assistance, query generation, and real-time interaction features for practical database querying.
- Live: https://sqlbot-seven.vercel.app | GitHub: github.com/patelaryan123-tech/SQLBOT

ZYVEN – Senior Healthcare Platform

- Developed ZYVEN, an end-to-end senior healthcare platform using React.js, Express, MongoDB, and Groq Cloud LLMs, providing AI medical report analysis in 4+ regional languages.
- Integrated Tesseract OCR for automated report digitization and Web Speech API for hands-free voice interaction and audio summary playback for senior citizens.
- Engineered a real-time Emergency SOS broadcast system using Socket.IO and Geolocation, auto-dispatching live GPS alerts and emails to registered caregivers.
- Live: https://zyven-app.vercel.app/ | GitHub: github.com/patelaryan123-tech/ZyvenApp

EDUCATION

B.Tech – Computer Science Engineering — 2024 – 2028

Charotar University of Science and Technology (CHARUSAT)

Devang Patel Institute of Advance Technology and Research (DEPSTAR)
